BUILT TO IMPRESS

Dreamseeker Caravans F14 Tomcat is set to cause a stir with its high impact design, endless features and overall appearance. This is a Toy Hauler engineered and designed with a difference.

ENTERTAINMENT, EXHILARATION AND EXCITEMENT

After a day of riding you will look forward to returning to an environment like no other. The two-zone living space makes the Tomcat one of the smartest designs on the market. A classy Dometic quad lock door separates the two areas. To the front of the van we have the main living and sleeping areas. An east to west bed gives additional space and comfort. The interior design is very attractive with inclusions such as premium tapware, leather upholstery, matt black handles and a visually stunning bench top with a sleek stone feel.

Zone two is where things get really interesting. It is hard to miss the presence of a 49" Sony 4K Ultra HD Smart TV mounted efficiently along the side-wall with a Sony 6.2" Touchscreen DVD/Media player, Sony Amplifier and Sony Speakers. As if this wasn't impressive enough, fitted into the entertainment unit you will also find a Sony Playstation 4 Bundle Pack. You would be forgiven for thinking you were no longer inside a Toy Hauler.

Apart from its visual appeal Dreamseeker have also made sure that the F14 Tomcat is practical. They have included a full oven, reverse cycle Air Con, 185ltr Dometic 3-way fridge and a 4kg front loader washing machine.

The F14 Tomcat also includes RGB strip lighting. Customers can match their LED lighting to their favorite colour or the colours of a particular racing team all with the click of a button. Genius!

The Tomcat is loaded with features that make this model a camping enthusiasts dream van. A 32" smart TV is built into a customized unit in the main bedroom area. This is further complimented with state of the art speakers, WIFI, and a CD/DVD player.

Dreamseeker have designed and produced a very smart van with the F14 Tomcat. To power up this beast they have included a full Redarc battery management system, an inverter, 2 x 150 watt solar panels and 2 x 120 amp AGM batteries. All that's left to do is hook up and get on the road.

SLICK, SOPHISTICATED, JAW DROPPING

It is undeniable that the F14 Tomcat offers customers something new, exciting and impressive. Internally it is certainly made for entertaining. It is equally as impressive on the outside. For strength and durability Dreamseeker designed this model with its intended purpose very much at the forefront of their minds.

The chassis is 6" throughout. The ever-reliable and extensively tested Tuff Ride suspension offers an impressive ATM of 4T. A set of All Terrain Tyres come as standard with one spare cleverly mounted underneath the van. The frame is Aluminum throughout adding additional strength to F14.

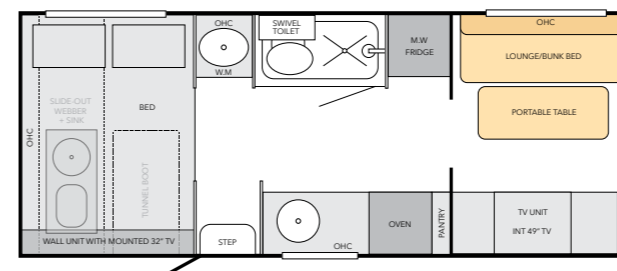

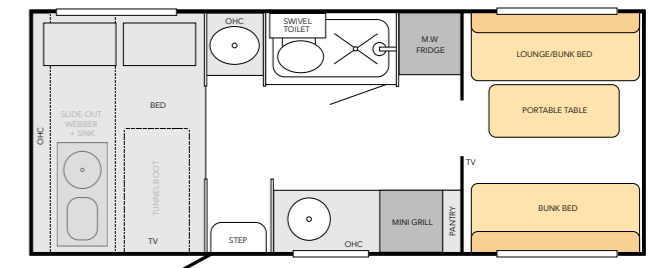

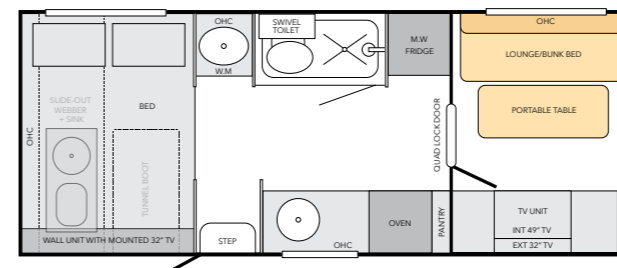

The bold, dominating black Aluminum Composite exterior undoubtedly captures attention. The stylish Dreamseeker logo and branding really stand out and make the Tomcat a visually stunning van on the road.

For comfort and safety there is an electric step, reverse camera and five external LED lights as well as additional bar lights. Dreamseeker have ensured they include plenty of external lighting for moving bikes and other items in and out of the van as required.

FREEDOM AT YOUR FINGERTIPS

The Dreamseeker F14 Tomcat offers customers an opportunity to experience the freedom of what we all know to be the ultimate outdoor lifestyle. Packed with features and crafted out of passion, the F14 Tomcat captures the raw, exhilarating and adventurous side of caravanning with a rare and beautiful twist.
